

Interview Summary Comments

Examiner intimated to attorney, James Kayden, registration# 31532, that Fig. 3 of the invention were modules which according to him were virtual circuits, and Figs 4, 5 were logic which were code related. Told same that the specification did not tie these modules to any device, but instead pointed to the modules which were software related. Further, pages 2-3 and 16 of the specification contained acronyms such as, sendit, sosend, uio, etc which were not defined. Same will review/amend specification/claims and submit amendment(s) for further consideration.
